

Cremation Urn Selection

To Select a Cremation Urn:

- You will need to know what the weight of the deceased person was. Each lb of weight equals a cubic inch of ash. This means if the person weighed 200lbs the ash would total approximately 200 cubic inches.

What are Cremation Urns Made Of?

- Cremation urns are manufactured and available using varied materials. Some materials available include but are not limited to:

Mineral, Metal, Wood, Cardboard.
